

ALWAYS, SOMETIMES, OR NEVER TRUE?

Read each statement, and then circle whether you think it's always, sometimes, or never true. Include an example that supports your classification and a non-example if it applies.

Statement	Classification	Example/Non-Example
The farther the ball dipped into the gravity bucket, the lower the gravitational pull it had.	Always True Sometimes True Never True	
When a heavy ball and a light ball were in the gravity bucket, the light ball would roll in toward the heavy ball.	Always True Sometimes True Never True	
Black holes have a higher gravitational pull than the sun.	Always True Sometimes True Never True	
Gravity is greater when objects are closer in distance to each other.	Always True Sometimes True Never True	
The greater the volume of an object, the greater the gravitational pull.	Always True Sometimes True Never True	
The greater the mass of an object, the greater the gravitational pull.	Always True Sometimes True Never True	
Distance influences the gravitational pull between two objects.	Always True Sometimes True Never True	
Mass influences the gravitational pull between two objects.	Always True Sometimes True Never True
