

SHARK TANK PRESENTATIONS

As you watch your classmates' presentations, consider the following information:

- **Cost:** How much will it cost to make the product? How much will they sell the product for?
- **Potential Risks:** What are the potential risks associated with making and/or using the product?
- **Talking Points:** What were their best talking points related to the science behind the problem?
- **Improvements:** What improvements could be made to the product (or the points presented)?
