Blood Type Tattoo Is Recommended

CHICAGO (UP) — An assistant secretary of defense said Thursday that every man, woman and child in the United States should be tattooed with his blood type. Dr. Frank B. Berry, assistant

secretary for health and medicine, said "this may sound radical, but it is the simplest and only sure method of making available what may prove to be lifesaving information."

Berry told the 41st annual meeting of the American College of Surgeons that it is not good enough for persons to carry tags or cards with their blood type, because these may be lost or be missing when they are needed.
