

Is Pizza Epic?

Word Choice

Grade Level	7th – 8th Grade	Time Frame	100 minutes
Subject	English/Language Arts	Duration	1-2 class period(s)

Essential Question

How can word choice affect communication?

Summary

The use of informal language and phrases in our writing and speaking is simply part of our culture. Idioms, slang, understatement, and hyperbole help characterize language by region, time period, and groups of people. Language, though, often benefits from precision, and appropriate word choice helps articulate what a writer truly wants to say without resorting to overused, trendy, and often inaccurate phrases. In this lesson, students will examine pieces of writing for modern hyperbole or inappropriate word choice and practice using precise language for the appropriate audience and purpose. This lesson can be completed in 1–2 class periods, depending on whether you decide to facilitate the optional class discussion.

Snapshot

Engage

Students work in pairs to match images with definitions.

Explore

Students work in the same pairs to match images with new definitions, leading to a discussion of appropriate word choice.

Explain

Students work with a handout of commonly overused or misused words and phrases, adding their own examples and suggesting alternatives.

Extend

Students work in pairs to complete a CER strategy in which they provide a claim, evidence, and reasoning to avoid a particular word choice and instead choose more precise language.

Evaluate

Students practice talking about word choice with their peers through a "Yes, Because..." activity.

Standards

Oklahoma Academic Standards for English Language Arts (Grade 7)

7.4.R.5: Students will use a dictionary, glossary, or a thesaurus (print and/or electronic) to determine or clarify the meanings, syllabication, pronunciation, synonyms, and parts of speech of words.

7.4.W.1: Students will use domain-appropriate vocabulary to communicate ideas in writing clearly.

Materials

- Lesson Slides (attached)
- Matching Set 1 and Matching Set 2 (attached; one copy of each per pair of students; printed, cut out, and placed in a separate envelope per set)
- Matching Set 1 and Matching Set 2 answer keys (attached)
- Overused and Misused Words handout (attached; one per student)
- CER handout (attached; one per student)
- Pens/pencils
- Internet access

Engage

Teacher's Note: Lesson Prep

Prior to beginning the lesson, print and cut out the Matching Set 1 and Matching Set 2 cards for each pair of students. Place each set of cards in a separate envelope. You'll use Set 1 in the Engage activity and Set 2 in the Explore activity.

Teacher's Note: Additional Resources

This lesson addresses misused and overused words. If you are looking for additional resources that will assist you in preparing to teach this lesson, two books worth consulting are *The Sense of Style*, by Steven Pinker, and *That Doesn't Mean What You Think It Means*, by Ross and Kathryn Petras. In addition, you might find [this article](#) by Jessica Stillman to be helpful.

Begin by telling students that they will be completing a challenge with a partner (or small group depending on class size). Pass out the Matching Set 1 cards to each pair or group and explain that the task is to match each image with the definition that fits most closely. Do not offer any hints or suggestions right now; just encourage students to do their best! This is a quick challenge, and it should take no more than 5 minutes.

Teacher's Note: Matching Difficulty

The definitions provided are those of overused words (epic, amazing, fantastic, unbelievable). The challenge is that the definitions do not adequately represent the images (sweatshirt, pizza, apps, and coffee), even though these words that are intended to express something truly special are often used to describe everyday objects. A key is provided on page 1 of the Matching Sets 1 and 2 Answer Key attachment.

After students have made their matches, hold up each image card and ask which definitions were used to describe each. It is likely that different pairs of students will have used different definitions for each of the pictures. Hold a brief discussion during this process, and ask how students chose the definitions to go with their pictures.

Collect the Matching Set 1 cards from students before proceeding to the next activity.

Teacher's Note: Considering Multiple Meanings

Throughout this lesson, select terms and their definitions are referenced for student use and discussion. It is an important conversation to have with students to address that words have multiple meanings to consider and that these meanings often evolve over time. For example, in this lesson "epic" as a noun "refers to a work of heroic poetry;" as an adjective, it is "extending beyond the usual or ordinary especially in size or scope." Referring to a pizza as epic is an overstatement/hyperbole, but the use of the word as an adjective is acceptable, albeit not the best word choice.

Explore

Now, pass out the Matching Set 2 cards. Tell pairs that they will be doing another round of matching with the same images, but this time with new definitions. Give them a short amount of time to do these new matches, and host the same discussion as with Matching Set 1. Hold up each image card. Which definitions did they choose? Why and how did they choose each definition to go with each picture?

Teacher's Note: Matching Ease

This second round ought to be quicker for students because Matching Set 2 has definitions of words that closely correlate with the pictures (sweatshirt: comfortable, pizza: savory, apps: useful, coffee: caffeinated). A key is provided on page 2 of the Matching Sets 1 and 2 Answer Key attachment.

Collect the Matching Set 2 cards.

Now that they have completed two rounds of image and definition matches, ask students in which round they were able to find a description for each image more quickly. Why?

Revisit the definitions from Matching Set 1, and reveal the words (epic, amazing, fantastic, unbelievable). Ask the question, Is pizza epic?

Share with students the definition of the word epic (noun: relating to a long poem, typically one derived from ancient oral tradition, narrating the deeds and adventures of heroic or legendary figures or the history of a nation; adjective: extending beyond the usual or ordinary especially in size and scope). Point out that this term falls into the category of terms that we have come to use frequently in our language without understanding or considering their true definitions. The same case can be made for many other words with which students are familiar. Ask them to share other words that are used frequently and might be considered overused or misused. Write these words on the board.

Possible Responses

Responses might include: *awesome, lit, literally, actually, or honestly.*

Teacher's Note: Informal Language Is Not All Bad

The use of informal language and phrases in our writing and speaking is part of our culture. Idioms, slang, understatements, and hyperbole help characterize language by region, time period, and groups of people. Language, though, often benefits from precision, and appropriate word choice helps articulate what a writer truly wants to say without resorting to overused, trendy, and often inaccurate phrases. Important in this lesson is to point out that it is natural for words and phrases to be overused in our language, largely due to popular culture; we don't want to judge groups of people, casual settings, or regions for use of words or phrases that have fallen into colloquial use. Rather, the goal is to work toward forming vocabulary options that offer more precise meanings to help us communicate clearly.

Explain

Transition the conversation to focus on communicating for the appropriate audience and purpose. Explain that hyperbole, slang, and idioms are appropriate when talking to friends and in casual conversation, but then ask for some examples of situations that students can think of where word choice needs to be precise.

Possible Responses

Student responses might include formal essays, letters requesting favors or funding, or job applications.

Teacher's Note: Exploring Figurative Language

This lesson does not introduce or have students practice distinguishing the differences between hyperbole, understatement, idiom, or other forms of figurative language. Consider the lesson [It's Raining Whats and Whats?](#) for practice with colloquial language.

Pass out copies of the Overused and Misused Words handout. This handout lists several words with examples of when their use might be inaccurate and other word choice options to consider instead.

Consider reviewing the first example (actually) as a class and holding a discussion about the following:

- Why does precision in word choice matter? (Hint: Go back to or introduce the essential question, "How can word choice affect communication?")
- For what audience would you be particularly careful about your word choice?
- For what purpose would you be particularly careful about your word choice?

Have students work in pairs (or independently, if you prefer) to review the next three examples (amazing/awesome, basically, and epic) and work toward an understanding of the "Consider That:" and "Consider Using:" columns.

After students have had a brief time to reflect on these commonly overused and misused words, ask them to complete the back of the handout and identify four more examples of overused and/or misused words and phrases. For each word or phrase that they include, they should explain the issue with the word choice in the "Consider That:" column and suggest alternatives to the word or phrase in the "Consider Using:" column.

Words to Consider

Examples of other words that students might consider include: *fantastic*, *honestly*, *irregardless*, *literally*, *unbelievable*, and *nice*.

Tech Talk

Encourage students to use their tech resources when looking for examples of words and phrases that are considered overused or misused. Additionally, tools such as [Thesaurus.com](https://www.thesaurus.com) and [Dictionary.com](https://www.dictionary.com) can help them consider other word choice options.

Extend

Once students have had time to complete the Overused and Misused Words handout by adding four of their own examples, they will engage in a [CER](#) activity. In this activity, students are asked to justify their thinking by establishing a claim, evidence, and reasoning.

Assign students a number from 1–8 to determine which word from their Overused and Misused Words handout they will focus on. (Or, assign numbers from 5–8 to include only the students' examples.) As an alternative, if you are looking for a way to ensure that your students can share their examples in an orderly fashion without feeling self-conscious about their responses, consider trying the [Airplane Landing](#) strategy.

Pass out copies of the CER **handout**, and ask students to complete the following:

1. Write a claim about why the word or phrase should be reconsidered due to overuse or misuse.
2. Back up the claim with evidence (from the "Consider That" and "Consider Using" columns).
3. Support the evidence with reasoning. (Why do the alternatives for this word or phrase more appropriately suit a particular purpose or audience?)

Sample Response

An example of how students might format their CER is: "The word 'epic' should be reconsidered in our word choice because it has been misused frequently in recent popular culture. An epic can refer to a work of heroic poetry or something that is way beyond ordinary, but people today use the word epic to refer to something that impresses them. If we used a more context-specific word, like 'fragrant' to describe a flower or 'savory' to describe a pizza, then a more accurate meaning could be communicated. This is especially important in something like a persuasive essay to an audience who we want to clearly understand what we're trying to say."

Ask students to share their CER responses in small groups or in a whole-class discussion.

Evaluate

As an evaluation for this lesson, consider using the [Yes, Because ...](#) strategy. Have students line up in two even rows facing each other, so that each participant is facing a partner in the opposite row. Start with the pair of students at the beginning of the line. Students hold their completed Overused and Misused Words handouts. One participant in the pair speaks, and then the other responds. The dialogue should sound something like this:

Partner 1: "The word 'amazing' should be reconsidered in word choice."

Partner 2: "Yes, because it is overused, and we could use a more specific word that fits the situation better."

After one pair of students is done, the next pair of students facing each other in the line continues with a new example from the handout. Examples can be repeated as new evidence or reasoning is introduced.

Optional Activity: Concluding Discussion

Engaging in a concluding discussion is an opportunity to further gauge the knowledge your students have acquired over the course of this lesson. Ask students the following questions: 1) "What did you learn today that surprised you the most?" 2) "Are there any words or phrases you'll stop using or try to use differently?" 3) "Do you think the meanings of words such as "epic" and "awesome" will change again over time?" 4) "Do you think it is important for us to use words according to their original definitions?"

The Yes, Because ... activity and the optional discussion serve as formative evaluation for this lesson.
